PROFILE SUMMARY

Bachelor of Computer Application student focused on Python backend development and AI/ML. Builds REST APIs using FastAPI and PostgreSQL, with experience in data analysis using NumPy and Pandas. Has built AI-powered applications integrating generative AI and currently developing skills in machine learning and AI agents.

PROJECT EXPERIENCE

Cartiva AI Shopping Assistant | Link

Python, FastAPI, React, PostgreSQL, AI/ML, Swagger, Render

- Built an **AI-powered** shopping assistant that analyses customer carts and provides personalized product recommendations.
- **Developed Cart Optimizer** and **Dynamic Bundle Builder** features to identify complementary products and relevant product combinations.
- Designed **RESTful APIs** with **FastAPI** for product cata-log, cart management, AI-agent interactions, and usage tracking.
- Integrated **PostgreSQL** for persistent product and cart data and instead backend APIs through **Swagger/OpenAPI**.

Catrimonial AI-Powered Cat Matching Platform| Link

Java 17, Spring Boot, PostgreSQL, Docker, FastAPI

- Catrimonial AI is an AI-powered ecosystem for responsible cat owners.
- Developed matching and **recommendation** workflows using cat characteristics and user-provided information.
- Created an **interactive frontend** for managing profiles and exploring AI-generated matches.
- Integrated AI-based recommendation logic into the application workflow.

TECHNICAL SKILLS

Programming Languages: Java , Python(Primary)
Backend Development: FastAPI, REST APIs, HTTP, CORS, Authentication, PostgreSQL, Supabase
Databases: PostgreSQL, MySQL, SQL
APIs & Web: HTML, Tailwind CSS, Swagger/OpenAPI
AI/ML : NumPy, Pandas, Generative AI

EDUCATION

Bachelor of Computer Applications *June 2025 – July 2028*

JSS CACS Autonomous College, Mysore, Karnataka | CGPA: 7.5 / 10
